Part two: A) Read the following passage then choose the best answer to the questions below: (2) points each.2

Louis Braille was born near Paris, France, in 1809. When he was a little boy, Louis loved to play with his father's tools. One day, when he was four, he was playing with his father's tools when a sharp tool went into his left eye. An infection started in his left eye and went to the other eye. He was unlucky. A few weeks later, Louis was blind. His parents took him to a school for blind children in Paris. The school had some books that blind people could read. These books had letters that stood out. He had to feel each letter with his fingers. A whole book weighed 400 pounds. He tried to find a way for blind people to be able to read books. He worked night after night to make a simple system with dots. By the 15, he had finished his system. He showed (it) to other students and they loved it. The school didn't want a 15-year-old invention to be better than their own heavy books and wouldn't let students read Braille books. Finally, after 20 years, the school agreed to use Braille.
